Allowable Subject Matter

Claims 1-22 are allowed.

The following is an examiner's statement of reasons for allowance: While prior art teaches seats that move forward when its seatback is folded over the bottom, prior art does not teach a downwardly and rearwardly sloped ramp means operatively mounted in fixed relation with respect to a fixed track member; a drive link assembly having a ramp contact member and being operatively mounted on the seatback member for translational engagement of the ramp contact member with the ramp means, such that as the seatback member is forwardly folded about the seatback pivot axis from its upright occupiable design position its substantially horizontal load supporting position the track lock means moves to the released configuration, and the ramp contact member moves downwardly and rearwardly along the ramp means to thereby cause rearward longitudinal movement of the seat assembly relative to the fixed track member to a predetermined rear longitudinal position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
